

# MachMotion Control Software Demo Installation Instructions

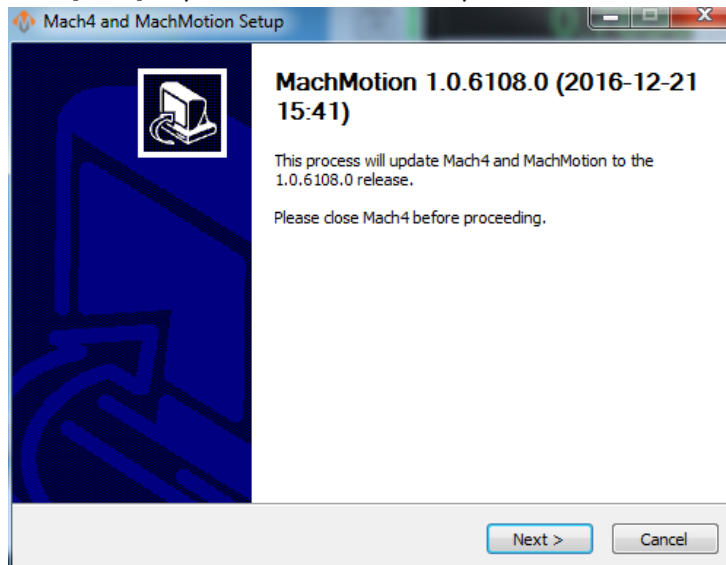

1. Visit <http://machmotion.com/mach4-demo> and download the latest version of the MachMotion control software installer by clicking "Download and demo software today!"
2. This is an .exe file. Depending on your browser, you may need to give permission to download, like below.

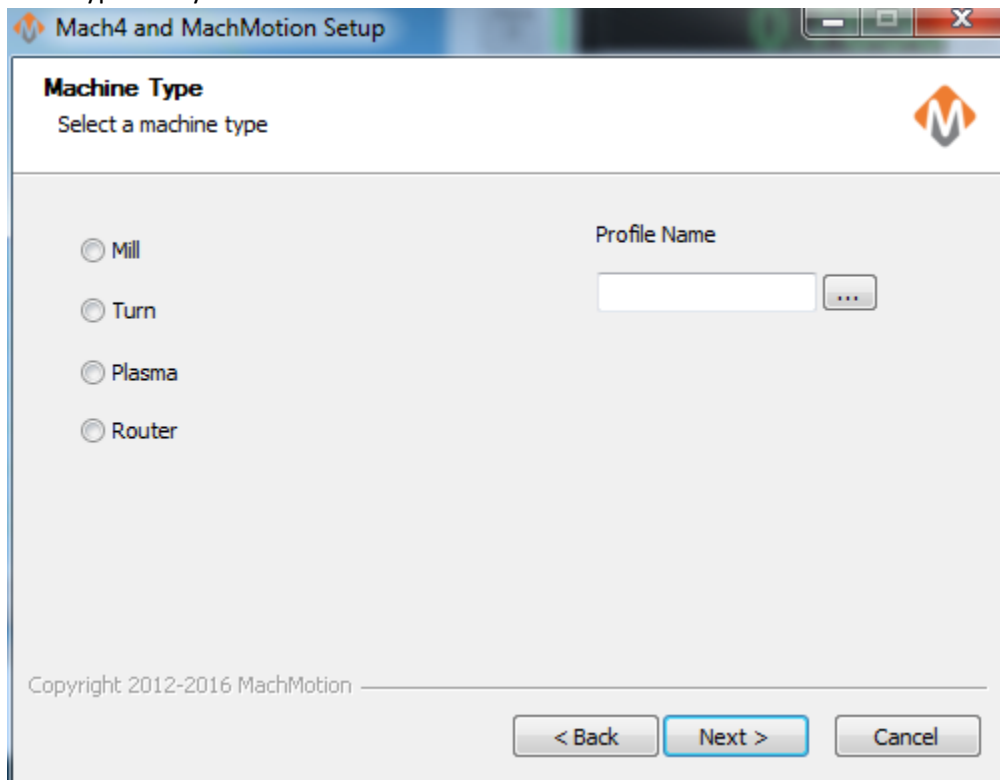

3. Once the installer is downloaded, select [Run].

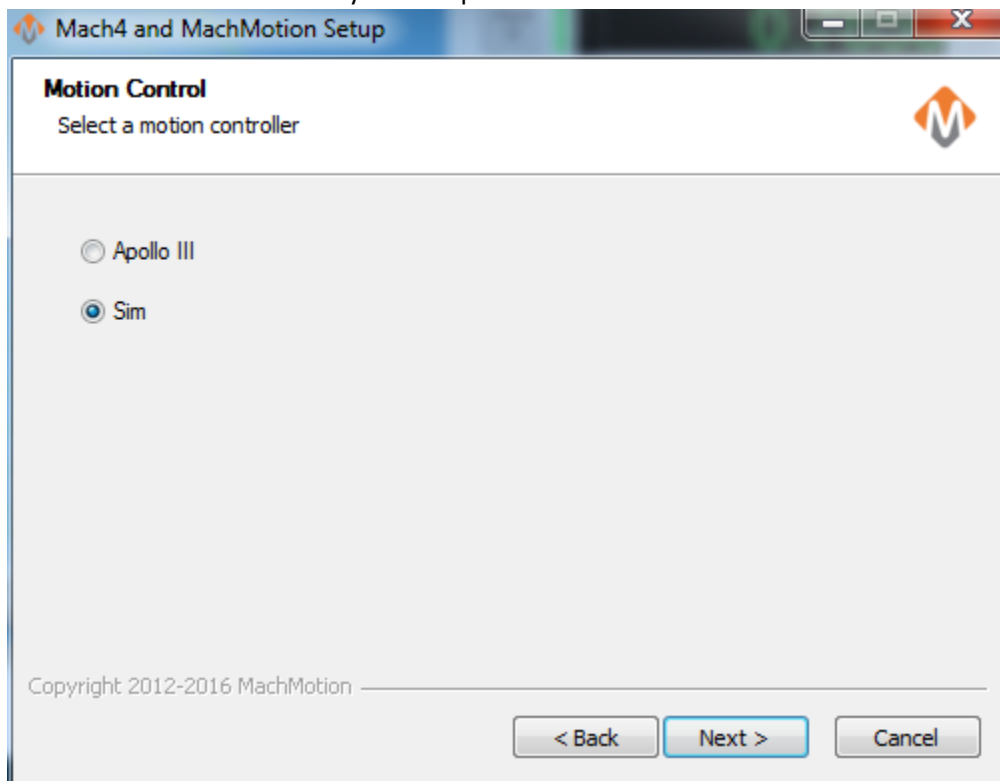

4. Once the installer begins, click [Next] to proceed to the next steps.

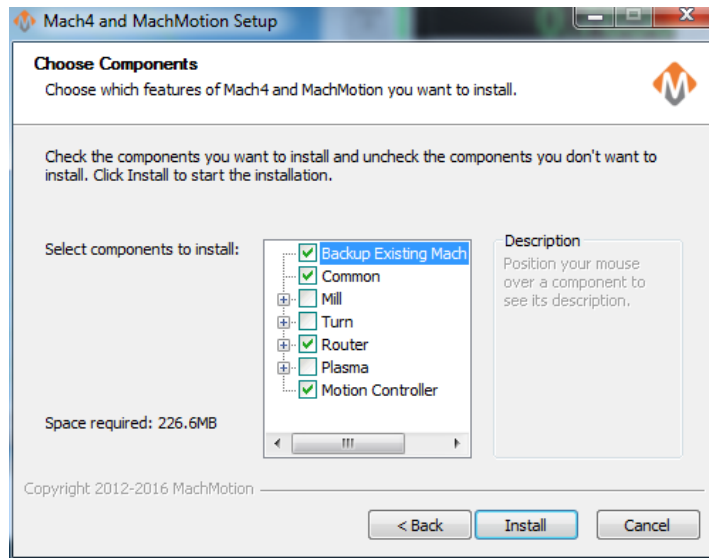

5. Select the machine-type that you would like to demo.

6. Select "Sim" to run a simulated version on your computer.

7. Allow the installer to install the standard selections and click [Install].

8. Once the installer is finished, there will be a shortcut on the desktop for the machine type you selected. If you want to demo multiple machine types, run the installer again and select a different machine type.
