Production Quality Control Technician

Overview: We are looking for a qualified Production Quality Control Technician to join our production team. You will be responsible for testing all components that are built and shipped on a daily basis.

As a Production Quality Control Technician, you will be the individual working with other departments to continue to push quality components and software to our customers.

Anticipated schedule: Full Time – 8:00 am to 5:00 pm

Responsibilities:

- Verify all software and systems are working and properly set up before they are shipped
- Quality check of physical condition and presentation of components
- Component test drives and motors
- Program PLCs, drives, and VFDs with parameter files
- License all software shipping on our controls
- Diagnose wiring, engineering, and software errors and communicate with the appropriate parties about resolutions

Knowledge, Skills, and Abilities:

- Detail oriented person
- Understand how things fit into the larger picture
- Strong problem-solving skills
- Windows PC experience and comfortability navigating multiple software products
- Understanding of electrical concepts and experience diagnosing basic electrical problems
- Ability to accurately describe issues and coordinate with resolution teams
- 1-2 years of production experience

Education and Experience:
